this thoroughly revised and updated edition of adrian bardon s a brief history of the philosophy of time is a short introduction to the history philosophy and science of the study of time from the pre socratic philosophers through einstein and beyond bardon covers subjects such as time and change the experience of time physical and metaphysical approaches to the nature of time the direction of time time travel time and freedom of the will and scientific and philosophical approaches to cosmology and the beginning of time he employs helpful illustrations and keeps technical language to a minimum in bringing the resources of over 2500 years of philosophy and science to bear on some of humanity s most fundamental and enduring questions

time is central to our lived experience of the world yet as this book reveals it is startlingly difficult to reconcile the way we seem to experience time with many of the theories presented to us in physics and metaphysics this comprehensive and accessible introduction guides the unfamiliar reader through difficult questions at the intersection of the metaphysics and physics of time it starts with the assumption that physics and metaphysics are inextricably connected and that each can and should shed light on the other the authors explore a range of views about the nature of time showing how different these are from the way we typically think about time and our place in it they consider such questions as whether time travel is possible and if it is whether we can change the past whether there is a single moment that is objectively present whether time flows or is static and whether ultimately time exists at all an introduction to the philosophy of time will appeal to students of physics and philosophy who want both a comprehensive overview of the area and enough depth to allow for rigorous discussion the book s detailed readings and exercises will challenge students and provide a clear

roadmap for further study

as a growing area of research the philosophy of time is increasingly relevant to different areas of philosophy and even other disciplines this book describes and evaluates the most important debates in philosophy of time under several subject areas metaphysics epistemology physics philosophy of language philosophy of mind cognitive science rationality and art questions this book investigates include the following can we know what time really is is time possible especially given modern physics must there be time because we cannot think without it what do we experience of time how might philosophy of time be relevant to understanding the mind body relationship or evidence in cognitive science can the philosophy of time help us understand biases toward the future and the fear of death how is time relevant to art and is art relevant to philosophical debates about time finally what exactly could time travel be and could time travel satisfy emotions such as nostalgia and regret through asking such questions and showing how they might be best answered the book demonstrates the importance philosophy of time has in contemporary thought each of the book's ten chapters begins with a helpful introduction and ends with study questions and an annotated list of further reading this and a comprehensive bibliography at the end of the book prepare the reader to go further in their study of the philosophy of time

the routledge companion to philosophy of physics is a comprehensive and authoritative guide to the state of the art in the philosophy of physics it comprises 54 self contained chapters written by leading philosophers of physics at both senior and junior levels making it the most thorough and detailed volume of its type on the market nearly every major perspective in the field is represented the companion's 54 chapters are organized into 12 parts the first seven parts cover all of the major physical theories investigated by philosophers of physics today and the last five explore key themes that unite the study of these theories i newtonian mechanics ii special relativity iii general relativity iv non relativistic quantum theory v quantum field theory vi quantum gravity vii

statistical mechanics and thermodynamics viii explanation ix intertheoretic relations x symmetries xi metaphysics xii cosmology the difficulty level of the chapters has been carefully pitched so as to offer both accessible summaries for those new to philosophy of physics and standard reference points for active researchers on the front lines an introductory chapter by the editors maps out the field and each part also begins with a short summary that places the individual chapters in context the volume will be indispensable to any serious student or scholar of philosophy of physics

this book is an edited collection of papers from international experts in philosophy and psychology concerned with time the collection aims to bridge the gap between these disciplines by focussing on five key themes and providing philosophical and psychological perspectives on each theme the first theme is the concept of time the discussion ranges from the folk concept of time to the notion of time in logic philosophy and psychology the second theme concerns the notion of present in the philosophy of mind metaphysics and psychology the third theme relates to continuity and flow of time in mind one of the key questions in this section is how the apparent temporal continuity of conscious experience relates to the possibly discrete character of underlying neural processes the fourth theme is the timing of experiences with a focus on the perception of simultaneity and illusions of temporal order such effects are treated as test cases for hypotheses about the relationship between the subjective temporal order of experience and the objective order of neural events the fifth and the final theme of the volume is time and intersubjectivity this section examines the role of time in interpersonal coordination and in the development of social skills the collection will appeal to both psychologists and philosophers but also to researchers from other disciplines who seek an accessible overview of the research on time in psychology and philosophy

a classic treatise on hindu and buddhist philosophy edited by renowned indologist

in the philosophy of change the distinguished scholar of chinese philosophy chung ying cheng advances our understanding of the yijing by analyzing its philosophy in comparison to western philosophical traditions cheng focuses on critically comparing philosophies of science religion and metaphysics in leibniz whitehead neville and cobb alongside classical chinese views on reality divinity knowledge and morality the book begins and ends with questions related to the character of chinese metaphysical traditions which contrast with the mainline metaphysical traditions found in western europe and north america cheng argues throughout the book that the philosophical underpinnings of basic concepts in chinese culture are ultimately rooted in key claims found within the yijing 易经 and one of its standard commentaries the yizhuan 易传 the book serves as a complementary volume to the author s previous book the primary way philosophy of the yijing which lays out a comprehensive and systematic philosophy based on the symbolism and text of the classical document and its traditional commentaries

scientific history of philosophy was one of the professional branches of soviet philosophy and a place where philosophical culture was preserved in an often hostile environment situated between the ideological exigencies of the soviet system with its marxist leninist theoretical foundation and the need for an objective account of philosophy s past soviet history of philosophy displays the characteristic features of soviet philosophy as a whole including a forceful reappearance of its hegelian background this book is the only western monograph on this important part of soviet philosophy thus filling the last main gap in western philosophical sovietology at the same time it offers the first survey of soviet philosophy after the disappearance of the soviet system itself embarking on an historical and meta philosophical investigation of soviet philosophical culture the book will be of interest to students of soviet and russian philosophy historians of philosophy and specialists in soviet studies

this edited collection presents the latest cutting edge research in the philosophy and

cognitive science of temporal illusions illusion and error have long been important points of entry for both philosophical and psychological approaches to understanding the mind temporal illusions specifically concern a fundamental feature of lived experience temporality and its relation to a fundamental feature of the world time thus providing invaluable insight into investigations of the mind and its relationship with the world the existence of temporal illusions crucially challenges the naïve assumption that we can simply infer the temporal nature of the world from experience this anthology gathers eighteen original papers from current leading researchers in this subject covering four broad and interdisciplinary topics illusions of temporal passage illusions and duration illusions of temporal order and simultaneity and the relationship between temporal illusions and the cognitive representation of time

the two volume work modernism has been awarded the prestigious 2008 msa book prize modernism has constituted one of the most prominent fields of literary studies for decades while it was perhaps temporarily overshadowed by postmodernism recent years have seen a resurgence of interest in modernism on both sides of the atlantic these volumes respond to a need for a collective and multifarious view of literary modernism in various genres locations and languages asking and responding to a wealth of theoretical aesthetic and historical questions 65 scholars from several countries test the usefulness of the concept of modernism as they probe a variety of contexts from individual texts to national literatures from specific critical issues to broad cross cultural concerns while the chief emphasis of these volumes is on literary modernism literature is seen as entering into diverse cultural and social contexts these range from inter art conjunctions to philosophical environmental urban and political domains including issues of race and space gender and fashion popular culture and trauma science and exile all of which have an urgent bearing on the poetics of modernity

philosophical foundations of the physics of space time this concise book introduces

nonphysicists to the core philosophical issues surrounding the nature and structure of space and time and is also an ideal resource for physicists interested in the conceptual foundations of space time theory tim maudlin s broad historical overview examines aristotelian and newtonian accounts of space and time and traces how galileo s conceptions of relativity and space time led to einstein s special and general theories of relativity maudlin explains special relativity with enough detail to solve concrete physical problems while presenting general relativity in more qualitative terms additional topics include the twins paradox the physical aspects of the lorentz fitzgerald contraction the constancy of the speed of light time travel the direction of time and more introduces nonphysicists to the philosophical foundations of space time theory provides a broad historical overview from aristotle to einstein explains special relativity geometrically emphasizing the intrinsic structure of space time covers the twins paradox galilean relativity time travel and more requires only basic algebra and no formal knowledge of physics

bukharin s philosophical arabesques was written while he was imprisoned in the lubyanka prison in moscow facing trial on charges of treason and later awaiting execution after he was found guilty after the death of lenin bukharin cooperated with stalin for a time once stalin s supremacy was assured he began eliminating all potential rivals for bukharin the process was to end with his confession before the soviet court facing the threat that his young family would be killed along with him if he did not while awaiting his death bukharin wrote prolifically he considered philosophical arabesques as the most important of his prison writings in its pages he covers the full range of issues in marxist philosophy the sources of knowledge the nature of truth freedom and necessity the relationship of hegelian and marxist dialectic the project constitutes a defense of the genuine legacy of lenin s marxism against the use of his memory to legitimate totalitarian power consigned to the kremlin archives for a half century after bukharin s execution this work is now being published for the first time in english it will

be an essential reference work for scholars of marxism and the russian revolution and a landmark in the history of prison writing

philosophical romanticism is one of the first books to address the relationship between philosophy and romanticism an area which is currently undergoing a major revival this collection of specially written articles by world class philosophers explores the contribution of romantic thought to topics such as freedom autonomy and subjectivity memory and imagination pluralism and practical reasoning modernism scepticism and irony art and ethics and cosmology time and technology while the roots of romanticism are to be found in early german idealism philosophical romanticism shows that it is not a purely european phenomenon the development of romanticism can be traced through to north american philosophy in the era of emerson and dewey and up to the current work of stanley cavell and richard rorty the articles in this collection suggest that philosophical romanticism offers a compelling alternative to both the reductionist tendencies of the naturalism in analytic philosophy and deconstruction and other forms of scepticism found in continental philosophy this outstanding collection will be of interest to those studying philosophy literature and nineteenth and twentieth century thought
